

NOOMEZ

NNZ WHITEPAPER-2025 EDITION

Migrate to the Moons

A Meme Coin With a Mission

Deflationary • Lore-Driven • Holder-Powered • Utility-Fused

“Commissioned to take the Noomies to the Moons”

SECTION 1: INTRODUCTION

Most coins launch with no purpose.

No face. No meaning. No reason to believe.

NNZ is different.

This project was built to stand out, not just on a chart, but in people's emotions. It was born from a story, powered by belief, and designed to deliver real momentum in the market while giving holders something they've been waiting for: a reason to care.

At the center of NNZ is Nik Noomez, far more than a meme mascot. Nik is a symbol, a lunar-born being from another timeline. He didn't come here to fit in. He came to lead, to find the scattered Noomies, and take them back with him to the Moons.

Who are the Noomies? They are his people. Each one found through belief. Each one lighting the path forward. The Noomies are us, the NNZ holders. Every purchase charges Nik's energy. Every stage fuels his journey. NNZ is not a pump, it is momentum with memory.

As Nik's Noom Gauge fills, segment by segment, a new kind of token story unfolds: one that gives real rewards, surprise events, and utilities that pay holders with tokens from other projects eager to join the NNZ fire.

The 28-stage presale is a lunar countdown. With each passing phase, we move closer to something greater. And the people who believed early will be remembered for it.

By the time launch arrives, the world will already know Nik Noomez. And those who joined him won't just be holders, they will be the first to return to the Moons.

SECTION 2: THE STORY OF NIK NOOMEZ

Long before anyone knew his name...

Before tokens, Telegram chats, or rocket emojis...

There was a night deep in the African desert that cracked open the sky. The air was hot.

Still. The stars burned quietly. Silence ruled – until it didn't.

A shimmer of silver light descended, pulsing softly, then splitting the horizon in two. When the dust cleared, a young antelope stood in the glow. Small. Dust-covered. Horns faintly flickering with light not of this world.

Something in his eyes made it clear: this one was not from here.

Enter Nik Noomez.

Nik was not like the others. He didn't run. He didn't flinch. He stood tall, gazing upward, as if remembering something beyond this world.

Nik had not been born in the desert. He had been sent from the Moons of another timeline. Not as a visitor, but as a messenger.

His body was that of an antelope, but the Moons had gifted him something no creature of his kind had ever carried:

- The soul of the Moons
- The memory of the multiverse
- The ability to travel through timelines

Gifted with human-like traits, he could communicate, inspire, and lead. He understood emotion. He understood markets. He understood memes.

The Moons didn't send him empty-hooved. They equipped him with the Noom Gauge, a glowing bar of lunar energy threaded through his antlers, split into 28 radiant segments. Each time someone believes... each time someone buys NNZ... the Gauge fills. At the end of every stage, a segment ignites. When all 28 glow, Nik's fuel is complete.

Nik didn't come for fans. He came to gather the Noomies. The loyal, the believers, the people who would join him, coin in hand, and return with him to the Moons.

And now... it is time.

The orbit spins. The Vault waits. His horns glow brighter with every passing phase. Nik Noomez speaks, and his message is clear:

“We don't just go to the Moon. We go back to the Moons. All of them. Together.”

SECTION 3: THE MISSION ASSIGNED

Nik Noomez did not fall to Earth by accident. He was chosen.

The Moons. Ancient, intelligent forces from another timeline saw something shifting. Memes were growing. Belief was rising. The world was finally loud enough to listen again.

But belief without direction is chaos. So the Moons selected Nik, the only antelope ever born with both instinct and insight. They gave him the rarest gift: the chance to grow his pack, select the loyal, and bring them back to the Moons.

And then they sent him here, with a mission.

That mission? To gather the Noomies.

Not fans. Not followers. Buyers. Believers. Those who feel the pull, who understand that something rare is about to happen.

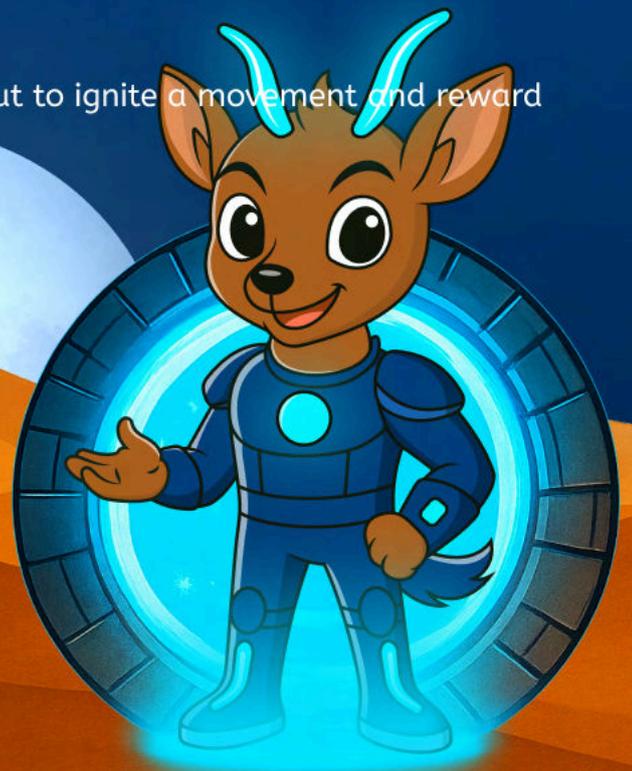

His path was designed around 28 glowing segments, each one a stage. Every purchase surges energy through the Noom Gauge. Every completed stage lights a segment. And when the Gauge is full, something ancient unlocks a power hidden by the Moons long ago.

But the mission is not just about returning. Nik's journey has purpose:

- To turn belief into value.
- To convert lore into access.
- To transform laughter into lasting profit.

Each stage grows stronger. Each chapter grows louder. The Vault hums. The Engine builds. The Moons are watching.

Nik Noomez came not just to gather the noomies, but to ignite a movement and reward those who join him in the migration.

SECTION 4: THE NNZ PRESALE

The journey of NNZ doesn't begin at launch. It begins now – in the 28-stage presale, where Nik's return to the Moons takes shape and the Noom Gauge begins to glow. This isn't just fundraising. It's a lunar countdown – a saga in 28 chapters. Every stage fuels the Gauge. Every completed stage lights a segment. Every step carries us closer to ascension.

PRESALE MECHANICS

- Total Presale Supply: 140,000,000,000 NNZ (50% of total)
- Phase Allocations (tiered for narrative + scarcity):
 - Stage 1–7: 12,700,000,000 NNZ each
 - Stage 8–14: 5,000,000,000 NNZ each
 - Stage 15–21: 2,000,000,000 NNZ each
 - Stage 22–28: 300,000,000 NNZ each
- Price Path: \$0.00001 → \$0.0028 across 28 stage (280× total).
 - Prices increase smoothly by a constant factor each phase (published live on the dashboard).
- Cadence: Sell-out or 7 days max per stage.
 - When a stage sells out, the next stage opens immediately. If a stage does not sell out by day 7, it closes and advances.
- Unsold Handling (Deflationary):
 - All unsold tokens at stage close are permanently burned.
 - No rollovers. No re-issuance. The presale remains capped and deflationary.
- Gauge Activation: Each completed stage lights one segment on the Noom Gauge.
- Stage X Million Airdrop (Compliant):
 - At the end of every stage, one eligible wallet from that phase is selected by verifiable random draw to receive X million NNZ (where X = stage number).
 - Eligibility: minimum \$20 equivalent purchased in that stage; one entry per wallet per stage.
 - Proof of randomness is published.
- Noom Rewards (Presale Staking): Optional, lore-tied staking available during presale (details in Section 7). Rewards accrue during presale and unlock 30 days after launch, up to 66% APY (annualized), with a 2× multiplier for Stages 1–7 stakers.

THE 28 STAGE SAGA OF THE GAUGE

1. Genesis Horn – The spark of belief is lit.
2. Desert Born – A stranger rises under shattered skies.
3. Moonlit Whisper – The signal finds its first ears.
4. Ash & Embers – The Gauge begins to burn brighter.
5. The Herd Awakens – The first Noomies gather at the call.
6. Rise of the Glow – Horns pulse with stronger fire.
7. Pulse of Seven – The rhythm of destiny grows louder.
8. Crossing Shadows – Nik steps beyond the ordinary path.
9. The Hidden Hum – The Vault begins to tremble unseen.
10. Voice of the Moons – The signal resounds across worlds.
11. Thunder in the Horns – Energy erupts across the desert sky.
12. The Tidal March – The Noomies surge forward in unity.
13. The Waiting Silence – The Moons hold their breath.
14. The First Vault – The lock opens; the secret is revealed.
15. Aftershock – The Noomverse trembles with what was unleashed.
16. Faithfire – Only true believers burn this bright.
17. Howl of the Horns – Energy screams through the cosmos.
18. Stairway to Stars – Nik ascends beyond the earthly realm.
19. The Flood of Noomies – An unstoppable tide joins the migration.
20. March of Shadows – The orbit tightens; fate approaches.
21. Celestial Shift – The stars themselves obey the Gauge.
22. Signal of the End – The second lock stirs awake.
23. The Lunar Hand – The Moons stretch forth, beckoning Nik.
24. The Noomstorm – A cosmic surge strikes unrelentingly.
25. The Last Ascent – Every step heavier with destiny's weight.
26. Edge of Light – The veil between worlds begins to tear.
27. The Hush Before – Final silence across the Noomverse.
28. The Lunar Ascension – The Final Vault opens. The migration begins.

STAGE REWARDS AT A GLANCE

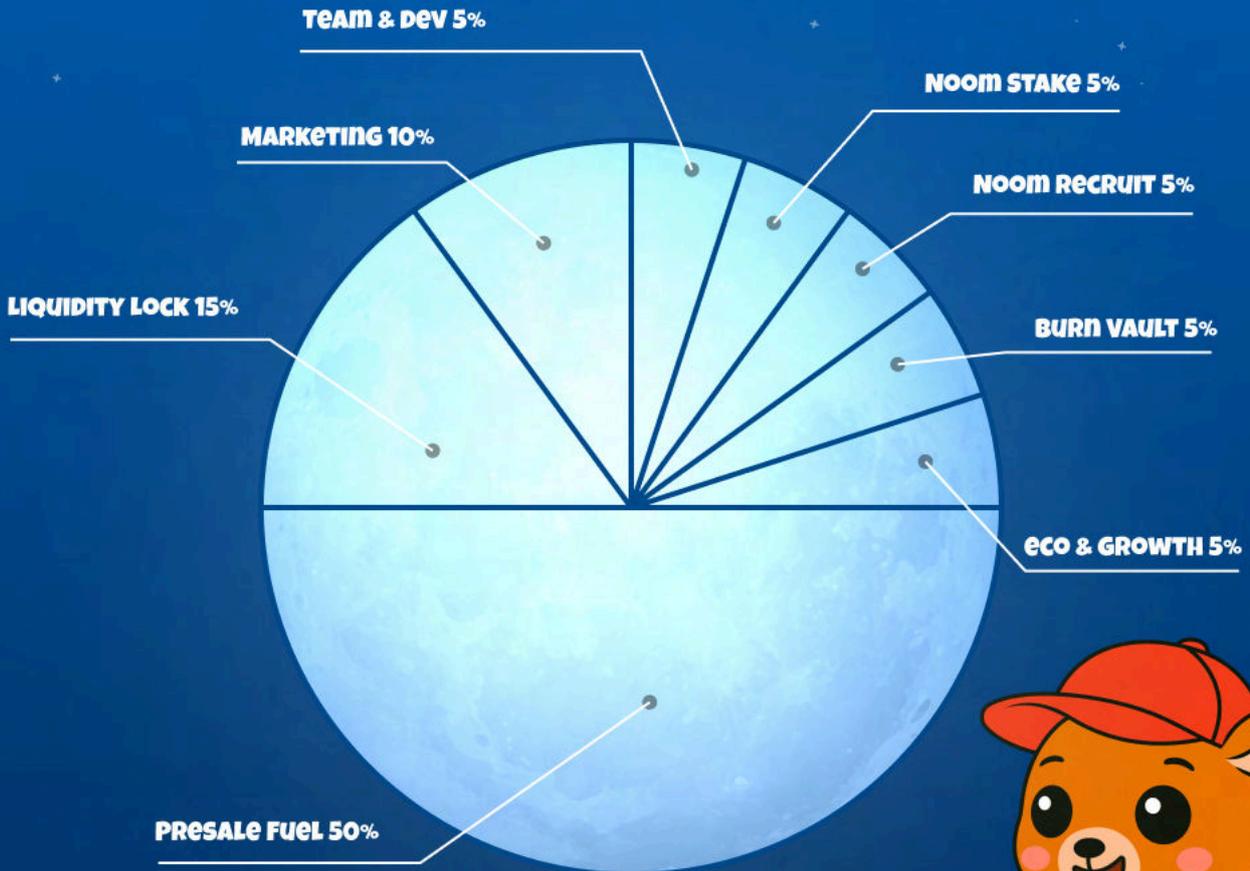

- Stage X Million Airdrops
 - Stage 1 → 1M NNZ
 - Stage 2 → 2M NNZ
 - Stage 14 → 14M NNZ
 - Stage 28 → 28M NNZ
- Stage 14: The First Vault
 - Major usdt rewards.
 - Extra token airdrops.
 - Bonus games.
 - Major burn event.
- Stage 28: The Final Vault
 - Major usdt rewards.
 - First Edition NFTs.
 - Strategic burn.
 - First Engine partner reveal.
 - One-hour live countdown to launch.

SECTION 5: NOOMONOMICS (TOKENOMICS)

Total Supply: 280,000,000,000 NNZ

Chain: Binance Smart Chain (BSC)

Model: Deflationary. Fixed supply. No minting. No inflation.

ALLOCATION BREAKDOWN

- Presale – 50% (140,000,000,000 NNZ): 28-stage presale powering the Noom Gauge. Any unsold tokens at stage close are permanently burned.
- Liquidity Pool – 15% (42,000,000,000 NNZ): Liquidity locked at launch via a third-party locker; publicly verifiable.
- Marketing – 10% (28,000,000,000 NNZ): Influencers, PR, paid reach, listings, and global campaigns.
- Team & Dev – 5% (14,000,000,000 NNZ): Vested 6–12 months; wallets public for transparency.
- Noom Stake – 5% (14,000,000,000 NNZ): Staking rewards pool for post-launch programs; may also support presale Noom Rewards accrual that unlocks T+30.
- Noom Recruit – 5% (14,000,000,000 NNZ): Growth incentives: referrals and community airdrops (including Phase X Million)
- Burn Reserve – 5% (14,000,000,000 NNZ): Strategic, lore-driven burns (e.g., Vault rituals, milestones) – all burns announced and on-chain.
- Ecosystem Growth – 5% (14,000,000,000 NNZ): Partnerships, integrations, tooling, and future utilities.

DEFLATIONARY DESIGN

- Stage-End Burns: If a Stage doesn't sell out by day 7, all unsold tokens from that stage are burned permanently.
- Burn Reserve (5%): Additional, planned burns tied to story moments (e.g., Stage 14/28 Vaults).
- Transparency: All burns, vesting schedules, and lockers are published with links.

TRUST & ALIGNMENT

- 15% liquidity locked at launch (public proof).
- Team & Dev vested 6–12 months to align incentives.
- KYC for core team; verified (blue-tick) socials to reduce impersonation risk.
- Open-source, verified contracts at launch.

PRESALE PRICING PATH

- Start: \$0.00001
- End: \$0.0028
- Total Curve: 280× across 28 stages(smooth, published per-stage schedule).
- Cadence: Sell-out or 7 days max per stage; unsold tokens burned at close; next stage begins.

In short: NNZ is engineered for hype and durability: a fixed supply, automatic deflation via stage-end burns, locked liquidity, clear vesting, and a single, clean growth bucket (Noom Recruit) that funds both referrals and airdrops (including Stage X Million).

SECTION 6: THE NOOM MAP (THE ARCS)

The journey of NNZ is more than stages and charts. It is a saga in arcs, each one marking a turning point in Nik's mission to return with the Noomies to the Moons. Every arc builds on the last, delivering hype, progress, and rewards. The roadmap is not a list – it is a living myth, a comic that unfolds in real time.

ARC I – THE FOUNDATION (Q3 2025)

The desert is silent. The first sparks of belief ignite.

- Social channels come alive (X, Telegram, TikTok, Instagram).
- Early lore drops tease Nik's arrival.
- Whitelist opens for first believers.
- Website, dashboard, and branding released in full poster-comic style. ● Final whitepaper published.
- Smart contract deployment & audit.

The horns flicker. The Gauge awakens.

ARC II – THE AWAKENING (Q4 2025)

The signal grows louder. The journey begins.

- Launch of the 28-Stage Presale.
- “Sell Out or 7 Days Max” mechanic revealed.
- Stage X Million Airdrops begin, one wallet chosen each stage. ● Lore rolls out stage by stage across social channels. ● Gauge tracker goes live.
- Influencer pushes and PR campaigns begin.

The Noomies awaken. The desert trembles.

ARC III – THE VAULT SIGNAL (Q1 2026)

Half the journey is complete. The Moons stir.

- Stage 14 unlocks the First Vault.
- Massive airdrop to one extra wallet + surprise lore fragments. ● USDT rewards.
- Strategic burns tied to the Vault event.
- First ecosystem partner teased.
- Speculation and hype accelerate.

The Gauge hums. The Moons reveal their first gift.

ARC IV – THE LUNAR ASCENSION (Q2 2026)

The horns blaze. The final stages approach.

- Momentum peaks through the last chapters.
- Stage 28 unlocks the Final Vault:
 - Extra 28M NNZ airdrop.
 - USDT airdrops.
 - First edition NFTs
 - Strategic burn.
 - First Access Engine partner revealed.
 - One-hour countdown to launch.
- The Gauge is full.

The skies split. The Noomies ascend.

ARC V – THE ENGINE IGNITES (Q3 2026)

The presale ends. The legend becomes a system.

- DEX listing (PancakeSwap) with 15% liquidity locked.
- CEX negotiations begin.
- Access Engine goes live, delivering partner token drops directly to NNZ holders. • Staking pools unlock, rewarding long-term believers.
- Lore expands into the Noomverse.

The Moons return. The story becomes endless.

This roadmap ensures constant movement: hype during presale, impact at Vaults, momentum at launch, and long-term sustainability with staking and the Engine.

SECTION 7: THE NOOM VAULT

Nik always felt it. A hum deep in his horns. Faint at first, then louder with each glowing thorn. Every stage filled the Gauge. Every believer made the resonance stronger. And then – halfway – the hum becomes a roar.

The Noom Vault is no ordinary lock. It is a seal built into the Moons themselves, waiting for the moment when belief burns brightest.

STAGE 14: THE FIRST VAULT

At the midpoint, the Moons reward the faithful.

- The Vault unlocks for the first time.
- One extra wallet wins 14M NNZ through a transparent randomizer. ● A strategic burn is triggered, permanently reducing supply.
- Extra surprises: lore fragments, usdt token rewards.

The first Vault is the turning point – proof that NNZ is not just a presale, but a lunar event.

STAGE 28: THE FINAL VAULT

The last thorn glows. The Gauge is complete. The desert sky cracks open one final time.

- One extra wallet wins 28M NNZ.
- First Edition NFTs minted for believers.
- A major burn event strengthens the supply before launch.
- The first Access Engine partner revealed.
- A 1-hour live countdown into launch begins.
- Major usdt airdrop.

When the Final Vault opens, the Moons return. The Noomies are marked. The launch ignites.

WHY THE VAULT MATTERS

The Noom Vault makes the NNZ saga unforgettable:

- Deflationary Power: Vault unlocks always tie to major burns, reducing supply and increasing scarcity.
- Hype Peaks: Each unlock is a spectacle that spreads across socials and crypto media.
- Believer Rewards: Loyalty is rewarded not just financially, but with story, myth, and recognition.

Once a Vault opens, the Noomverse changes forever.

The Moons are generous. The Moons are watching.

And the Noom Vault is their gift to the believers.

SECTION 8: THE STAGE X MILLION AIRDROP

Every stage is a chapter. Every chapter ends with a gift.

The Moons designed the presale so that no stage closes quietly – each one explodes with a reward. That is why the stage X Million Airdrop exists: the cosmic burst of energy that marks the end of every stage.

THE RULE OF THE MOONS

At the close of every stage (sell-out or 7-day timer):

1. Every buyer who meets the requirement is entered.
2. One wallet is chosen through a transparent randomizer.
3. That wallet receives the full prize: X million NNZ for that stage.

The Cosmic Scale of the Airdrops (valued at launch price: \$0.0028 per NNZ)

- Stage 1 → 1,000,000 NNZ → \$2,800
- Stage 2 → 2,000,000 NNZ → \$5,600
- Stage 3 → 3,000,000 NNZ → \$8,400
- Stage 4 → 4,000,000 NNZ → \$11,200
- Stage 5 → 5,000,000 NNZ → \$14,000
- Stage 6 → 6,000,000 NNZ → \$16,800
- Stage 7 → 7,000,000 NNZ → \$19,600
- Stage 8 → 8,000,000 NNZ → \$22,400
- Stage 9 → 9,000,000 NNZ → \$25,200
- Stage 10 → 10,000,000 NNZ → \$28,000
- Stage 11 → 11,000,000 NNZ → \$30,800
- Stage 12 → 12,000,000 NNZ → \$33,600
- Stage 13 → 13,000,000 NNZ → \$36,400
- Stage 14 → 14,000,000 NNZ → \$39,200
- Stage 15 → 15,000,000 NNZ → \$42,000
- Stage 16 → 16,000,000 NNZ → \$44,800
- Stage 17 → 17,000,000 NNZ → \$47,600
- Stage 18 → 18,000,000 NNZ → \$50,400
- Stage 19 → 19,000,000 NNZ → \$53,200
- Stage 20 → 20,000,000 NNZ → \$56,000
- Stage 21 → 21,000,000 NNZ → \$58,800
- Stage 22 → 22,000,000 NNZ → \$61,600
- Stage 23 → 23,000,000 NNZ → \$64,400
- Stage 24 → 24,000,000 NNZ → \$67,200
- Stage 25 → 25,000,000 NNZ → \$70,000

- Stage 26 → 26,000,000 NNZ → \$72,800
- Stage 27 → 27,000,000 NNZ → \$75,600
- Stage 28 → 28,000,000 NNZ → \$78,400

ANTI-BOT PROTECTION: ONLY TRUE NOOMIES QUALIFY

The Moons will not waste their energy on shadows. To keep rewards pure:

- Minimum Contribution: \$20 equivalent of NNZ per stage required for entry.
- One Entry Per Wallet: Whether you buy \$20 or \$20,000, you get only one ticket. Every Noomie stands equal before the Moons.
- Transparent Randomizer: Winners are selected using public, verifiable tools. Proof is always shown to the community.

This ensures bots, sybil wallets, and manipulators cannot hijack the rewards. Only real believers qualify.

WHY IT MATTERS

- For Small Buyers: A \$20 entry makes you equal in the eyes of the Moons.
- For Whales: Your buys fuel the Gauge — but you stand shoulder to shoulder with all Noomies in the draw.
- For the Community: Every phase closes with drama, memes, and global hype.

LORE OF THE DROP

The Stage X Million Airdrop is not a chance — it is a myth. It is described as lunar energy overflowing from the Gauge, too powerful to contain, and choosing one Noomie at random to carry it.

- Stage 3 Example: A small believer wins 3M NNZ; social media erupts. ● Stage 14 Example: The Vault doubles the spectacle — 14M NNZ + a major burn. ● Stage 28 Example: The final gift before launch — 28M NNZ + Final Vault cascade.

It is not a lottery. It is destiny.

The Stage X Million Airdrop ensures that the presale is not just buying and waiting — it is a constant spectacle, a reason to watch every closing, a story beat in the saga of Nik Noomez.

SECTION 9: SECURITY & TRUST

In the Noomverse, belief creates momentum — but belief must also be protected. That is why NNZ was designed on a foundation of transparency, fairness, and verifiable trust. Every system has been hardened against the risks that plague meme coins.

SMART CONTRACTS

- Independent Audit: NNZ contracts will be audited by a trusted third-party security firm before launch.
- Fixed Supply: 280B NNZ, permanently capped. No minting. No inflation.
- Verified Code: Contracts will be open-source and verified at launch.

LIQUIDITY LOCK

- 15% of total supply locked into liquidity at launch.
- Locked through a third-party provider (e.g., Team Finance, Unicrypt).
- Proof visible to the community.
- Liquidity cannot be withdrawn or altered — making NNZ anti-rug by design.

TEAM & DEV WALLETS

- 6–12 Month Vesting: Prevents early dumps and aligns incentives with holders.
- Transparent Wallets: All team wallets visible from launch.
- Aligned Growth: Team only wins when NNZ grows.

DEFLATION & BURNS

- Stage-End Burns: Any unsold tokens at stage close are permanently burned.
- Burn Reserve (5%): Controlled supply reductions tied to lore events (Vault openings, milestones).
- On-Chain Proof: Every burn is visible and announced.

NOOM VAULT INTEGRITY

- No hidden token supply.
- Unlocks only at Stage 14 and Stage 28, each tied to airdrops + burns.
- Rewards revealed publicly and transparently.

STAGE X MILLION FAIRNESS

- \$20* Minimum Buy Per Stage to qualify.
- One Entry Per Wallet.
- Transparent Randomizer. Results visible to the community.
- No advantage for whales, no room for bots.

THE ENGINE TRUST LAYER

- Only vetted meme/NFT/Web3 projects may join.
- Airdrops distributed only to wallets meeting minimum holding thresholds.
- Live dashboard shows every partner drop.

KYC & VERIFIED SOCIALS

- Core team will undergo KYC verification with an independent provider.
- Official NNZ accounts will be blue-tick verified, blocking impersonators.

THE PROMISE OF SAFETY

NNZ protects its believers from rugs, hidden supply games, and bot manipulation. Every contract, every wallet, every burn, every Vault unlock is transparent. This is how belief becomes trust. And how trust becomes legend.

SECTION 10: LAUNCH

When the final Stage closes... when the last thorn of the Noom Gauge glows... when the Final Vault bursts open...

The migration begins.

The launch of NNZ is more than a listing. It is the transformation of a presale into a legend. The believers become Genesis Holders. The Noomies complete their journey. And the Moons open the way to the markets of Earth.

THE TRANSFORMATION

- The presale ends, with all 28 stages complete.
- All purchased NNZ are distributed directly to wallets.
- The Gauge is full – Nik’s horns blaze with cosmic fire.
- The Moons signal the beginning of live trading.

WHERE WE LAUNCH

- Blockchain: Binance Smart Chain (BEP-20).
- DEX Listing: PancakeSwap pairs (BNB/NNZ, USDT/NNZ).
- Liquidity: 15% of supply permanently locked via a third-party locker.
- Transparency: Proofs published and visible to the community.

POST-LAUNCH CONTINUATION

The launch is not an ending. It is the ignition of the next arc:

- Trading Begins: The NNZ chart becomes the pulse of the Noomverse.
- Engine Ignites: Partner projects start sending tokens directly to NNZ holders.
- Noom Rewards Staking Opens (30–365 days): Believers begin to earn yields.
- Lore Expands: Nik’s journey and the Noomverse continue beyond the presale.

WHY LAUNCH MATTERS

Most meme coins launch quietly, slipping into exchanges unnoticed. NNZ will not. By the time liquidity goes live, the story will already be written across Twitter, TikTok, Telegram, and the wider crypto space. By the time NNZ is tradeable, Noomies will not just be holders — they will be part of a movement.

The launch is the beginning of the next legend. The Moons are waiting.

SECTION 11: STAKING SYSTEM

Belief is strongest when it's locked in place. For Noomies who go beyond buying and choose to commit, the Moons have prepared a dual staking system — one tied to the presale journey, and one to the post-launch expansion.

This system rewards loyalty twice: once for those who stake during the presale, and again for those who continue into the Noomverse after launch.

PRESALE STAKING: NOOM REWARDS

During the presale, believers have the chance to lock their NNZ early.

- Lock-In: Presale staking begins as soon as the 28-stage sale is live.
- Vesting: Rewards are locked until 30 days after launch. No instant exits, no early cash-outs.
- Reward Pool: Powered by the Noom Stake allocation (5%), plus potential bonuses tied to the Stage X Million and Vault events.
- Why It Matters: It ensures that stage 1–28 buyers aren't just early – they are rewarded for showing the deepest conviction in the journey.

When the presale ends, these believers walk into launch not just as holders, but as stakers bound to the Moons, knowing their payout awaits just one month later.

POST-LAUNCH STAKING: THE KEEPER'S PATH

Once trading begins, a new system opens for all Noomies.

- Duration Options: 30 days → 365 days. The longer the lock, the stronger the yield.
- Reward Pool: Fueled by the Noom Stake reserve, with additional flows from Engine partners who choose to reward stakers.
- Lore Integration: Each staker becomes a “Keeper of the Noomverse,” with their locked NNZ seen as glowing thorns feeding Nik's Gauge even beyond launch.
- Extra Rewards: Top stakers may receive exclusive NFTs, collectibles, or Engine partner perks.

PROTECTION & FAIRNESS

- Smart Contracts: Fully audited, with all staking pools visible and verifiable on-chain.
- Early Exit Penalty: Breaking a lock early results in penalties to discourage abuse and protect the system.
- Transparency: All rewards, payouts, and timelines shown on the dashboard.

WHY STAKING MATTERS

- For Presale Stakers: Confidence is rewarded with a vesting payout that keeps early hype strong and prevents reckless dumping.
- For Post-Launch Stakers: Long-term loyalty earns compounding rewards and exclusive benefits.
- For the Ecosystem: Locked supply = reduced sell pressure = stronger market stability.

The Moons designed staking as a way to separate tourists from true believers. Buyers can hold freely. But those who lock — those who bind their NNZ to the Moons — step into a higher role. In NNZ, loyalty is not just respected. It is rewarding. Twice.

SECTION 12: NOOM RECRUIT (REFERRAL REWARDS)

The Moons reward not only those who join the journey, but also those who bring others along. Noom Recruit is the referral system of NNZ, designed to grow the herd by rewarding both the inviter and the invited.

HOW IT WORKS

- When a buyer joins NNZ through a referral link:
 - Referrer receives 10% bonus NNZ (calculated from the referred buyer's purchase).
 - Referred buyer also receives 10% bonus NNZ, ensuring that both sides benefit.
- Rewards are delivered instantly at the time of purchase.
- All referral activity is transparent and recorded in the dashboard.

WHY IT MATTERS

- Fair Growth: Both recruiter and recruit win, avoiding one-sided reward structures.
- FOMO Amplifier: Buyers have an extra reason to onboard friends, family, and communities.
- Sustained Hype: Every referral multiplies the story of NNZ across social circles, pushing the migration further.

TRUST & ALIGNMENT

- No hidden fees or dilution — bonuses are distributed from the dedicated Noom Recruit allocation (5% of total supply).
- Transparent tracking ensures buyers can see rewards credited instantly. • Protects against manipulation with anti-bot rules and one-time use per wallet per referral.

In the Noomverse, belief spreads. With Noom Recruit, the Moons make sure those who grow the herd are rewarded alongside those who join it.

SECTION 13: THE NOOM ENGINE

The presale is the saga. The launch is the ignition. But the Noom Engine is the heartbeat that keeps NNZ alive forever.

It is the system designed to ensure that belief is rewarded not just once, but continuously — day after day, long after the presale candles fade.

HOW THE NOOM ENGINE WORKS

1. New Projects Pay Tribute. Meme coins, NFT collections, and Web3 ventures pay to access the NNZ community.
2. The Engine Collects. A portion of their tokens are taken as the entry toll.
3. Noomies Receive. Those tokens are automatically distributed to NNZ holders.

NO STAKING. NO CLAIMING. JUST HOLDING.

- If you hold NNZ, the Engine delivers.
- Tokens flow directly into your wallet — no extra steps.
- No gas-heavy claims. No confusing dashboards.
- Holding is all it takes to become part of the reward stream.

THE TRUST LAYER

The Engine is curated.

- Only vetted projects may enter.
- No rugs. No low-quality coins. No “who dis?” projects.
- Entry is invitation-only, overseen by the Noom Council and the team.
- Every drop is tracked, recorded, and displayed publicly.

WHY THE ENGINE MATTERS

- For Holders: Continuous token drops provide real value.
- For Projects: Instant exposure to a loyal, high-energy community.
- For the Ecosystem: Creates a perpetual motion system where new projects fuel NNZ’s longevity.

ENGINE + STAKING SYNERGY

- All NNZ holders receive Engine drops automatically.
- Stakers may receive multipliers, bonus drops, or exclusive perks.
- Staking is optional — but always rewarding.

LORE OF THE ENGINE

The Engine is not a machine. It is alive.

- Fed by belief.
- Fueled by new projects.
- Beating endlessly for the Noomies.

Nik's horns carry its rhythm. The Gauge glows with its energy. And every Noomie feels its pulse in their wallet.

THE ENGINE AT A GLANCE

- Source: Tokens from partner projects.
- Distribution: Automatic, proportional to NNZ holdings.
- Eligibility: All NNZ holders (bonus perks for stakers).
- Transparency: Live dashboard showing every drop.
- Curation: Only vetted, credible partners onboard.

The Noom Engine is the answer to the biggest problem in meme coins: how to create value beyond hype.

NNZ does not fade after launch. It grows stronger.

Because as long as Noomies hold, the Engine never stops.

SECTION 14: FREQUENTLY ASKED QUESTIONS (FAQ)

WHAT IS NNZ?

NNZ is a deflationary meme coin powered by story, stages, and the Noom Engine. It's built around Nik Noomez, a lunar-born being leading the Noomies (holders) back to the moons.

HOW DOES THE PRESALE WORK?

- The presale is divided into 28 stages.
- Each stage runs for 7 days maximum – or closes earlier if sold out.
- Unsold tokens at the end of a stage are burned forever.
- Prices increase each stage, starting at \$0.0001 and ending at \$0.028.
- Earlier = cheaper entry, more tokens. Later = higher price, more momentum.

WHAT IS THE NOOM GAUGE?

The Noom Gauge is Nik's energy meter, split into 28 glowing segments.

- Every stage lights up one segment.
- When all 28 glow, the Gauge is full.
- At full charge, the presale ends and launch begins.

WHAT IS THE STAGE X MILLION AIRDROP?

At the end of every stage, one wallet is chosen at random.

- That wallet wins X million NNZ equal to the stage number (e.g., Stage 7 → 7M NNZ).
- To qualify, buyers must purchase at least \$20 worth of NNZ in that stage.
- Each wallet gets only one entry per stage.
- Winners are selected transparently via a verifiable randomizer.

WHAT IS THE NOOM VAULT?

The Vault is a hidden lunar lock that opens twice:

- Stage 14 (The First Vault): A major airdrop + surprise rewards.
- Stage 28 (The Final Vault): 28M NNZ extra airdrop, NFT first edition, strategic burn, partner reveal, and the one-hour launch countdown.

WHEN DO I RECEIVE MY TOKENS?

- All NNZ tokens purchased during presale are distributed immediately after Stage 28 closes.
- Trading begins at launch with liquidity locked.

WHAT IS THE NOOM ENGINE?

The Engine is NNZ's long-term utility:

- New projects pay to join the ecosystem.
- A share of their tokens is distributed automatically to NNZ holders.
- No staking or claiming is required (though staking adds bonus multipliers).

DO I NEED TO STAKE TO EARN REWARDS?

No.

- All NNZ holders receive Engine token drops automatically.
- Staking is optional but unlocks higher yields, NFTs, and bonus perks.

IS NNZ DEFLATIONARY?

Yes.

- Fixed supply: 280B NNZ.
- No minting. No inflation.
- Unsold presale tokens are burned at the close of each stage.
- Additional burns occur at key lore events such as Vault unlocks.

IS NNZ SAFE?

Yes.

- Contracts are independently audited.
- Liquidity (15%) is locked via a trusted third-party.
- Team wallets are vested 6–12 months.
- The core team undergoes KYC.
- Official socials are verified (blue tick).

WHAT HAPPENS AFTER LAUNCH?

- NNZ launches on PancakeSwap (BSC).
- Trading pairs (BNB/NNZ, USDT/NNZ) open with locked liquidity.
- Noom Engine begins delivering partner tokens to holders.
- Noom Rewards staking system activates.
- Lore continues, expanding the Noomverse beyond presale.

SECTION 15: FINAL WORDS & THANK YOU

NNZ is not your average coin.

Not another fleeting pump,

Not another meme lost in the noise.

This is a world – with a story, a face, and a mission.

Nik Noomez was sent to Earth with purpose: to gather his people, ignite the Noom Gauge,
and lead the faithful back to the Moons.

And if you're here, reading this now, you are early. You are here before the headlines,
before

the frenzy, before the chart starts its climb. You are here at the beginning – where belief
matters more than speculation, and loyalty matters more than trend.

The thorns of the Gauge are lighting.

The Stage X Million rewards are falling.

The Noom Vault hums with secrets waiting to erupt.

The Moons are watching.

But most importantly – you are invited.

Invited to buy the token.

Invited to join the believers.

Invited to write the greatest meme coin saga ever told.

Because in this story, you're not just a buyer.

You are a Noomie. And together...

We don't just go to the moon.

We migrate back to the Moons.
